## Optimal Health

Optimal health is more than just diet, exercise and medical care. It includes being on your personal passionate path and living your ultimate life adventure.

## The Institute

The Health Optimizing Institute is a non-profit research and training organization. At UCSD with our affiliates we have provided training for over 20,000 health professionals in optimal health care since 1973.

The pledge of HOI is to discover and make available the best programs and services for freeing our vast potential and promoting optimal health.

## Energis® The Best Kept Secret

A major contribution of the Health Optimizing Institute was researching and bringing together the most effective programs in Energy Healing.
